All My Love-Mel Tillis
Author:Ruth Durand, Henri Contet, Mitchell Parish

```
C                G7      F                 C
I can't give you silver  I can't give you gold
F               C        D7                  G7
Baby I can't do anything but to have and to hold
C               G7           F              C
I can't buy you diamond rings or the stars above
      F                 C      F        C   G7 C
But I promise that I'll always give you all my love

                    G7      F                 C
Maybe you dream of someone maybe you need a man
F                C           D7                   G7
To help make your life easier when you're feeling sad
C               G7           F                     C
I could be that someone that you might be dreaming of
          F                 C      F        C   G7 C
And can I promise that I'll always give you all my love

               G7             F                  C
Take away that coat of sorrow you won't need it now
F               C                       D7                 G7
I can't buy you diamond rings but I'll let you wear your smile
C                     G7            F             C
I've seen ever thing I need to see beneath the sky above
    F                 C      F        C   G7 C
But know that I could always give you all my love

      F                   C      F        C   G7 C
But I promise that I will always give you all my love
```
