A castle in the Sky-Marty Robbins

```
G                     C          G
I dreamed that we were livin' in A castle in the sky
  D7                      G
A world of make believe a dream for you and I
                   C             G
For one time in my lifetime I was sure about your love
  D7                        G
I held you in my castle in the sky

     C                    G
Then from another world a stranger came one day
  C                         G          D7
I begged you not to leave but you left anyway
  G             C            G
I saw my castle tumble back to earth and there was I
     D7                            G
With memories of My castle in the sky

                         C           G
The trouble that we're havin' does it mean there's someone new
   D7                         G
Or am I just bothered by the thought of losing you
                         C        G
Will someone come and take you will I lose you by and by
    D7                              G
Like I lost you in my castle in the sky

      C                     G
If we should ever part the world for me would end
    C                       G
How could I tell my heart I only lost a friend
                     C             G
Be faithful don't forsake me never leave and say goodbye
      D7                              G
Like you left me in my castle in the sky
```
