If I Lay Down The Bottle-Moe Bandy
Author:Dave Kirby and Warren Robb

```
C                        F
Me and that ole sunshine is sinking mighty low
                  C              D7                      G7
The difference is that lucky sun has got some place to go
     C                            F
This whiskey world I'm living in is not where I want to be
                  C                G7                    C
If I lay down the bottle would you lay back down with me

  G7                           C
I really mean it this time    cross my heart
D7                               G7
I didn't take the drink today   at least that's a start
    C                             F
I'm begging you like I should do right down on my knees
                  C                G7                    C
If I lay down the bottle would you lay back down with me

                                          F
My life seems like it's been a thousand bad dreams ago
                C                  D7                 G7
The whiskey had me all dressed up with no place to go
C                       F
Can your mind remember the man I used to be
                  C                G7                    C
If I lay down the bottle would you lay back down with me

Repeat #2

F                 C                G7                    C
If I lay down the bottle would you lay back down with me
```
