A Little Guy Called Joe-Stonewall Jackson
Author:Marijohn Wilkin and Wayne P. Walker

```
C                                    F                C
In a war torn land of poverty some where across the sea
                                                      G7
There's a little guy who's waiting and he looks a lot like me
    C                              F          C
His hair is like a raven or the wings of a crow
                                          G7                C
I don't know what they named him but I'm sure they call him Joe

       F                                C
Just a little guy called Joe like so many more I know
                                     G7
Left all alone somewhere across the sea
       C                             F              C
I want him to have my name little Joe is mine to claim
                         G7            C
This little guy called Joe belongs to me

                                     F               C
His mother died to give him life the night my orders came
                                           G7
I wanted to be with them but war's an evil thing
    C                                F             C
Now he won't recognize me but I've got to let him know
                                          G7            C
He means much more to someone than just a little called Joe
```
