A Thousand Miles Ago-Webb Pierce
Author:Mel Tillis and Webb Pierce

```
G
There's thousand miles in back of me and many more to go
                          C             G
Riding on a freight train feeling mighty low
                                                      C
I keep wonderin' why she quit me  but  I guess I'll never know
                     G      D7            G
Yes she used to be my baby a thousand miles ago

 C                      G
A thousand miles ago I started feeling bad
D7                            C             G
'Cause I just lost the future I thought I really had
                                                    C
I know I shouldn't feel this way but I still love her so
                   G                D7             G
I can't keep from thinking about a thousand miles ago

I know I've held her in my arms  a thousand times or more
                                 C             G
Promised her a world of love 'til I learned the score
                                                     C
That's why I'm feeling lonesome that's why I'm feeling low
                     G      D7            G
Yes she used to be my baby a thousand miles ago

 C                      G
A thousand miles ago I started feeling bad
D7                            C             G
'Cause I just lost the future I thought I really had
                                                    C
I know I shouldn't feel this way but I still love her so
                   G                D7             G
I can't keep from thinking about a thousand miles ago
