Alcohol Love-Billy Walker

```
C       F                    C
Alcohol love is just a quick romance
                          G7                   C
That puts your head in a spin your heart in a trance
        F                           C
Alcohol love it makes you feel so good
                  G7                      C
But when it's all over you'd die if you could

                    F
You're reeling and rocking up in the clouds
          C
But you're soon to take a fall
  F
I guess it's better to have your alcohol love
        D7                   G7
Than to never have loved at all
        F                    C
Alcohol love stay away from me
                 G7                  C
I've had to much love on my alcohol spree
```

Repeat
