All You Want When You Please-Tom T. Hall

```
G                                  B7
I'm sitting here looking at some mighty hard times
C                       G
Money ain't growing on trees
                         B7
A little while ago I was rolling in dough
C                 D7              G
Singing all you want when you please

C       D7              G
All you want when you please girls
C       D7              G
All you want when you please

                         B7
The wind blows up this road all summer
C                                  G
In the evenin' it cools one and all
                                     B7
If you like a good breeze you can have all you please
C                  D7                 G
If you don't get blown away in the fall
```

Repeat #2

```
                              B7
My money's all gone and my breeze died down
C                              G
My bloom of youth's gone to seed
                              B7
I sit here and cry for the days all gone by
C                     D7             G
When I sang all you want when you please
```

Repeat #2

```
                                     B7
Well the meat's all lean and the bread's all done
C                                  G
And the cook rides a big white horse
                                       B7
You just come like you look and if you get your picture took
C                       D7                   G
You can tell 'em you was at the Mardi Gras
```

Repeat #2
