Am I Locking Someone In-Mel Tillis
Author:Joe Hayes and Fatima Atchley

```
G                                          C
When you left I changed the locks on all the doors
      G                             D7
And I swore I'd never let you in no more
      G                                  C
But I feel your presence here just like a ghost
           G                 D7             G
Each time I lock the door is when I feel it most

     C                                G
Am I locking someone out or someone in
                                       D7
I've got a feeling you're in the house again
     G                                C
Oh I wish I knew what this was all about
     G               D7               G
Am I locking someone in or someone out

                                      C
I just watch TV till it goes off each night
      G                                  D7
Then I lock the door and turn out all the lights
           G                               C
That's when you appear and I just stand and stare
           G                    D7                  G
I flip back all the lights and find there's no one there
```

Repeat #2

```
                     D7            G
Am I locking someone in or someone out
```
