Amigo-David Ball
Author:Kostas and David Ball

```
Am                D7    G
Where ever you go we go amigo
     D7
Been there through thick and thin
         G
Down and out and back again
      Am          D7    G
Where ever you go we go amigo
       D7                                 G
On the road that leads us to the setting sun

                          D7          G
Some people think you're just an old guitar
                     D7                    G
That may be true but that's not all you are
   G7                             C
No matter where I go or what I do
A7                               D7
I can always find a friend in you

repeat #1

               D7      G
We got into a mess in Abilene
                     D7             G
She was the prettiest thing I'd ever seen
    G7                                  C
The song you played made her forget that night
A7                                  D7
That she was the sheriff's lonely wife

repeat #1

                     D7           G
I think it's time to hit the road again
                      D7                 G
And see what's waiting for us around the bend
G7                                   C
Saddle up old friend we're leaving town
A7                                 D7
Drifting with the clouds bumming around

repeat #1
