Ancient History-Billy Walker
Author:Wayne P. Walker and Irene Stanton

```
C                                   G7
Just walk on out the door it's all over
                                   C
Forgiving you is just a waste of time
                                   G7
I don't believe that I'll live to regret it
             F                G7                C
Cause you're ancient history to this heart of mine

     F                                  C
I've marked you down as just another lonely page
                                                 G7
In the book of heartaches that you'll leave behind
       C                                 G7
Cause I've found out I'm better off without you
        F                G7                C
You're ancient history to this heart of mine

                                          G7
So many times I've heard the same old story
                                          C
Any fool can learn to read between the lines
                                                   G7
And this time you know you've burned all your bridges
       F                G7                C
You're ancient history to this heart of mine
```

Repeat #2
