Ancient History-Johnny Cash
Author:Wayne P. Walker and Irene Stanton

```
G                                    D7
Just walk on out the door it's all over
                                   G
Forgiving you is just a waste of time
                                    D7
I don't believe that I'll live to regret it
      C                        D7                G
Cause you're ancient history to this heart of mine

                                          D7
So many times I've heard the same ole story
                                           G
Any fool can learn to read between the lines
                                                 D7
And this time honey you've burned all your bridges
       C                D7                G
You're ancient history to this heart of mine

     C                                  G
I've marked you down as just another lonely page
                                                  D7
In the book of heartaches that you'll leave behind
      G                                 D7
Cause I've found out I'm better off without you
       C                D7                G
You're ancient history to this heart of mine
```

Repeat #3
