And God Created Texas-Johnny Bush

```
C                                F
God had a piece of heaven left over
       C                            G7
And He held it in the palm of His hand
C                    F
Put a lonestar high above it
     G7                           C
Then set it down beside the Rio Grande

                                                F
He made the horns on the steers a little longer
    C                   G7
Put thorns on the black chaparral
C                                      F
Set the tumbleweeds to grow and the wind to make ‘em roll
    G7                                   C
And chase the diamond backs along the trail

    F                      C
And Texas was a place He created
                                       G7
The nearest place to heaven on this earth
C                  F                      C
Put a cowboy in a show and called it a rodeo
    G7                             C
And put it in the middle of Ft. Worth

                                        F
Then God said there's just one thing missing
    C                   G7
But soon it will come along
C                                F
This land needs its own kind of music
   G7                                      C
So He willed a man named Bob to write the songs

       F                          C
He put Cotton Eyed Joe in the middle
                                    G7
Then put the fiddle in a masters hand
           C                        F                        C
And when he stars all alone and plays the Rose of San Antone
     G7                                        C
Then He let the course of nature complete the plan
```
