Another Beer Drinking Song-Gene Watson
Author:Dave Kirby and Warren Robb

```
C
You're just another   beer drinking song
                               G7
You're just another   somebody gone

You're just another something I did wrong
                                    C
You're just another   beer drinking song

                                              G7
Don't think that you're first time I've been walked out on
                                                 C
And you're not the first time that I've sang the blues
                                  G7
I'll just find somebody else to  drink alone
                                                C
And I'll dedicate these next few beers to you

Repeat #1

                                           G7
You're not the first time that I didn't settle down
                                             C
And you're not the last time I'm not ready too
                                            G7
And just for old times sake I'm buying   one more round
                                       C
And we'll all drink one more toast to you

Repeat #1
```
