Apple Jack-Dolly Parton

```
C                                      F              C
He lived by the apple orchard in this little orchard shack
                                     F             G7
His real name was Jackson Taylor but I called him Apple Jack
       C                             F             C
Now old Apple Jack was loved by everyone he ever knew
                                   G7                C
Apple Jack picked apples but he picked the banjo too

                           F           C
Play a song for me Apple Jack  Apple Jack
                             G7
Play a song for me and I'll sing
      C                    F           C
Play a song for me Apple Jack  Apple Jack
                         G7    C
Play a song  let your banjo ring

                           F                   C
Now I'd go down to Apple Jack's almost everyday
                                    F                G7
We'd sit and we'd drink applejack that old Apple Jack had made
          C                                F             C
Then he'd take his banjo down then he'd ask me if I'd sing
                                       G7             C
And he would play the banjo and I'd play my tambourine

repeat #2

                                    F             C
That's when I was just a kid and now that I am grown
                                           G7
All I have are memories old Apple Jack is gone
          C                          F               C
Oh  but he left me his banjo and it always takes me back
                             G7               C
And every time I play it I still hear Apple Jack
```
