As Long As I'm Dreaming-Hank Snow
Author:Vaughn Horton

```
C              F     C                    G7
As long as I'm dream-ing you'll be in my arms dear
                                           C
You'll never grow lonesome you'll never grow old
                               C7          F
I'll build you a castle at the end of the rainbow
                    C             G7          C
And as long as I'm dreaming I'll build it of gold

                F                              C
A tree full of blue birds will wake you each morning
                                    G7
A garden of r-oses will gather the dew
                C                              G7
I'm hoping and pray-ing that I'll never stop dreaming
                                               C
For as long as I'm dreaming I'll always have you

                F     C                    G7
As long as I'm dream-ing you'll be in my arms dear
                                           C
You'll never grow lonesome you'll never grow old
                               C7          F
I'll build you a castle at the end of the rainbow
                    C             G7          C
And as long as I'm dreaming I'll build it of gold
```
