As long As I'm Dreaming-Tanya Tucker
Author:Don Cook, Gary Nicholson, John Jarrard

```
Em                          C
I haven't even let myself remember
Em                                C                  G
I've locked you from my thoughts since you've been gone
      D7                  B7                Em
But tonight I'm giving in to that old feeling
     A7                                     D7
That I've been afraid of feeling for so long

                G         C                           Am
As long as I'm dreaming I might as well dream it all
              D7           C
Let my imagination fly beyond these lonely walls
                G             Bm                   C
As long as I'm dreaming my dream will always be
                  D7                Em
To find a way to love you back to me

                                  C
As I close my eyes we're back together
Em               C               G
Making love the way we use to do
    D7              B7            Em
You softly whisper I won't ever leave you
    A7                                      D7
And you seem so real that I believe it's true
```

Repeat #2

```
                                         C
As long as I can dream that it's not over
      A7                                      D7
There will always be a chance for you and me
```

Repeat #2

```
D7              G
As long as I'm dreaming
```
