As Long As There's A Chance-Moe Bandy

```
C                   G7            C
Well here I sit I'm all alone and blue
F              G7                  C
Since you left I don't know what to do
F                     G7              C  Am
My heart tells me that someday you'll be t-rue
   C                  G7                   C
As long as there's a chance I'll wait for you

                     G7              C
In a dream I found a-way up in the sky
F                G7                    C
Promised star we watched the world go by
F                    G7           C  Am
No one there could ever make us b-lue
   C                  G7                   C
As long as there's a chance I'll wait for you

   F                  G7                    C
As long as there's a chance that you'll be true
F                     G7                  C
This love within my heart will always yearn
F                     G7                   C  Am
For the day when you say our love will be t-rue
   C                  G7                   C
As long as there's a chance I'll wait for you

                     G7              C
I dream of how our love will always be
F                G7          C
How it will last until eternity
F                G7                  C  Am
Then I awake and find that it's not t-rue
   C                  G7                   C
As long as there's a chance I'll wait for you
                     G7                   C
As long as there's a chance I'll wait for you
```
