Atta Way To Go-Don Williams

```
C             F                        C
Atta a way to go you finally broke it off
              F                C        G7
Atta a way to go we can't even talk  or cry
F              C    G7            C
Or even wonder why  atta a way to go

             F               C
Didn't you believe me when I loved you
G7                  F               C
I guess you thought we were playing games
                F                   C
All this time I tried to think I've known you
G7                F                C
I guess I really only knew your name
```

Repeat #1

```
              F                     C
I thought you knew I lived my life just for you
G7                 F                C
There was just no price to big to pay
                   F                   C
And even though I know I still live for you
G7                     F                 C
The feeling's that you show won't let me stay
```

Repeat #1
