Baby Me Baby-Gene Watson
Author:Harland Howard

```
C       G7                            C
Baby me baby you know I've had a bad day
           G7                   C
So baby me baby chase my cares away
                        C7             F
Say I'm great and I'll make it though it may not quite be true
        G7                    C
Baby me baby as only you can do

        G7                                    C
Hold me close let those sweet lips kiss my wounds and make 'em right
D7                    G7
Tomorrow will be better but just help me through tonight
C                 C7                    F
Sweet baby don't start crying or I'll start crying too
        G7                    C
Baby me baby as only you can do

G7                                  C
Hold me close let those sweet lips kiss my wounds and make 'em right
D7                    G7
Tomorrow will be better but just help me through tonight
C                 C7                    F
Sweet baby don't start crying or I'll start crying too
        G7                    C
Baby me baby as only you can do

             G7                    C
Just baby me baby as only you can do
```
