Baby My Heart-Faron Young
Author:Eddie Hill

```
C                   F             C
You have to baby a heart that is lonesome
                         G7
Treat it with tenderest care
C                    F               C
Pamper and pet it and show that it's wanted
   G7                      C
Or else it will die in despair

G7                     F            C
Baby my heart now and tell me you love me
F                        G7
Say that we never shall part
C                     F             C
You can treat me anyway that you care to
    G7                        C
But you'll have to baby my heart

G7                     F            C
Baby my heart now and tell me you love me
F                        G7
Say that we never shall part
C                     F             C
You can treat me anyway that you care to
    G7                        C
But please try to baby my heart
```
