Baby That's Living-Eddy Arnold
Author:Jean Chapel

```
C                                                G7
I used to cry and then I forgot how and that's living
                                                    C
And there's no sweating up for my brow well that's living
    F
I'm doing everything I wanna do
  C
I don't do nothing that I don't want to
            G7                C
Well that's living baby that's living

G7                                        F     C
Planted my garden with seeds of love and hap-piness
G7                                                F      G7
And never left a foot of ground for fate to plant loneli-ness
C                                                   G7
I love everybody cause I'm full in love well that's living
                                                        C
Got the sun and the moon and the stars above and that's living
F                                   C
Roses is blooming all over the place I've got bouquets for the human race
       G7                 C
That's living baby that's living

                                                  G7
The beauty in life is all there to see that's living
                                               C
Ugly never gets through to me well that's living
F                                 C
Songs are ringing inside of me I can't quit humming that melody
       G7                 C
That's living baby that's living

Repeat #2
```
