Back In My Younger Days-Don Williams
Author:Danny Flowers

```
G7         C             F         G7     C
Back in my younger days  I used to go all night
G7         C             F        G7           C
Now I just stay at home  and everything is all right
G7          C              F         G7        C
Back when I first met you  I used to live in a haze
G7          C          F          G7      C
That was so long ago  back in my younger days

G7         C         F      G7        C
I would do anything  just a stumbling fool
G7             C                  F           G7      C
It's a wonder I'm standing here  I've broken so many rules
G7                  C             F          G7     C
Now I dance with you every night  and still I'm so amazed
G7                C          F          G7      C
Your love made a man of me  back in my younger days

Am                      C
Oh it doesn't seem that long ago
Am                           G7
You you make it feel like the first time we made love
                                          C
And I ain't ever getting enough well well well

G7                  C           F           G7           C
As I go through the photographs I laugh and you turn the page
G7                 C          F           G7       C
It's the ballad of me and you  from such an innocent age
G7           C                F      G7         C
Talk about a dream come true  we reinvented the phrase
G7                  C           F          G7      C
It's better than it used to be  back in my younger days

G7         C             F          G7      C
Back in my younger days  back in my younger days
G7                  C           F          G7      C
It's better than it used to be  back in my younger days
