Back On Her Mind Again-Johnny Rodriguez

```
C                                          F
One of these days that telephone is gonna ring
       G7                                 C
If I'm lucky it'll be that sweet young thing
                                         F
That I took advantage of when she was mine
        G7                                 C
Now I'm trying just to get back on her mind

         F              G7                 C
Lord I'd borrow beg and steal to kiss and hold her
        F                          G7              C
All her friends tell me she's had enough this time
  F                         G7                 C
I used to get a high when she cried on my shoulder
        F                  G7                C
Now I'm crying trying to get back on her mind

                                           F
If she calls I know just what I'm gonna say
         G7                                      C
That I'm sorry and I'll swear I've changed my ways
                                                 F
And I'll prove it if she'll just give me the time
     G7                                   C
Time enough to at least get back on her mind

Repeat #2

        F                 G7              C
Yes I'm crying trying to get back on her mind
```
