Band Keeps Playing On-Charlie Walker
Author:Red Simpson and Fuzzy Owen

```
C                                              F
You walked in with me but you walked out with someone else
G7                                  C
And left me sitting here alone all by myself
                        C7      F
I thought you were over him but I was wrong
               C        G7                          C
My world just stopped  but the band keeps playing on

     F                                           C
They just keep playing cause they don't notice you are gone
    F                                C                  G7
You walked right out on me while they played our favorite song
    C                                F
And before you reached the door my teardrops reached the floor
               C        G7                          C
My world just stopped  but the band keeps playing on

                                                   F
You said that you'd forgotten him and no more did you care
G7                                          C
But when he walked in your eyes lit up to see him there
                           C7             F
He asked you to dance and just like that you were gone
               C        G7                          C
My world just stopped  but the band keeps playing on
