**Be A Little Quieter-Porter Wagoner**

```
C                          F            C
When you left you said you would not be returning
                                      G7
Nothing here you'd ever want to see again
         C                    F           C
But each night you've come to visit me in memories
                           G7             C
And won't you be a little quieter if you can

     F                                  C
Last night I heard you walking in the hallway
                                         G7
And your footsteps sounded like a marching band
    C                F                   C
And I haven't slept in so long I can't remember
                          G7             C
So won't you be a little quieter if you can

                        F              C
Well you're back again tonight in the kitchen
                                       G7
I can hear you as you rattle the pots and pans
   C                     F            C
Oh what I'd give to see you when you visit me
                             G7         C
Cause these lonely walls're driving me insane

     F                                                  C
When you're finished with your bath please close the closet
                                                    G7
The dripping water sounds just like a driving rain
     C                  F               C
Each night I'm looking forward to your visit
                           G7             C
But won't you be a little quieter if you can
                          G7              C
I wish you'd be a little quieter if you can
```
