Be Sure You Know-George Morgan
Author:Vic Alpin and Jack Toombs

```
C                                G7
Be sure you know your love for me has died
                                          C
And there's no spark still burning deep inside
                                        G7
Don't force your heart to cheat and tell a lie
                                        C
Be sure you know before you say goodbye

F                            C
Be sure you know he is the one for you
           D7                                G7
If you find out you're wrong what will you do
               C               G7
Like me you'll be all by yourself to cry
                                        C
Be sure you know before you say goodbye

                           G7
Be sure that you can easily forget
                                          C
Those little vows we made when first we met
                                  G7
If there's a doubt oh darling please don't try
                                        C
Be sure you know before you say goodbye
```
