Beautiful Lady-Jack Greene

```
C                          F           C
I know you are a lady and why you are here
                                  G7         C
You're lonely cause all of your dreams disappeared
                             F             C
These honky tonk neon's are strangers to you
                                 G7                  C
You're running from old times in search of the new

                  F           C
Beautiful lady I see in your eyes
                        G7      C
Feeling compassion of a woman denied
                         F        C
Come let me hold you and love you away
                  G7           C
Beautiful lady I want you to stay

                           F          C
Although we are strangers I know you well
                                 G7           C
For I've lived the story your broken heart tells
                           F             C
Life without sunshine but now it's all rain
                                 G7          C
I've been down that road babe I know your pain
```

Repeat #2
