Beautiful Lies-Jean Sheppard
Author:Jack Rhodes

```
G              C
Beautiful lies beautiful lies
D7                                  G
Each word is a heartache in perfect disguise
                                C
I can't help but listen and then I realize
    D7                                  G
The words you have spoken are beautiful lies

                         C
Call me a dreamer in a fool's paradise
D7                                                 G
My heart knows no difference that love that's unwise
                         C
Tell me you love me and will till you die
     D7                                     G
Like music you thrill me with beautiful lies

Repeat #1
                                       C
I hear wedding bells ringing I have stars in my eyes
  D7                                       G
I see red roses blooming a rainbow in the sky
                                      C
All sweet things come to me in the twinkle of an eye
     D7                                    G
When you hold and tell me those beautiful lies

Repeat #1
```
