Before The Last Teardrop Dries-Norma Jean

```
G                                          C
Before the last teardrop dries before the day turns into night
          D7                                  G
Before the closing of the door when I won't see you anymore
                                           C
Before the dawn of the new day when we go our separate ways
         D7                                            G
It's just time for one goodbye before the last teardrop dries

   D7                           G
We knew this day was coming we saw it long ago
   A7                           D7
We knew our love had ended like the melting of the snow
         G                            C
But it's hard to finally say the cold hard facts of life
   D7                                                  G
To turn the page and start again when it cuts just like a knife

    D7                                 G
You looked away the moment came and I began to cry
        A7                                  D7
There's not much else to do or say our love has simply died
          G                                  C
Before the last teardrop dries before the day turns into night
          D7                                  G
Before the closing of the door when I won't see you anymore
                                           C
Before the dawn of the new day when we go our separate ways
         D7                                            G
It's just time for one goodbye before the last teardrop dries

         D7                                            G
It's just time for one goodbye before the last teardrop dries
```
