Beneath A Painted Sky-Tammy Wynette
Author:Joe Chambers and Bucky Jones

```
G                                    D7
There never was a little girl more wanted than me
                                   G
I had all the love a child could ever want or need
                             D7
Daddy gave me everything he could afford to buy
                                 G
An on the ceiling in my room he painted me a sky

                               D7
He told me not to be afraid when it stormed outside
                                  G
He said in your room sweetheart the sun will always shine
                                      D7
And through the years of growing up if something made me cry
                                 G
It didn't seem to hurt so bad beneath the painted sky

C                                G
Beneath the painted sky that's where I want to be
  C                                G                  D7
A place to go when this old world gets the best of me
  C                                          G             C
A place where dreams come true and no one ever says goodbye
     G                                D7                   G
Oh I wish that I could live again beneath the painted sky

                                     D7
Girls grow up and fall in love and that's how it is
                                   G
Sometimes the men don't love 'em like their daddy's did
                                  D7
Sometimes the hurt's so bad the way it is tonight
                                 G
It makes me wanna be back home beneath the painted sky

Repeat #3

Tag:                      D7                    G
Oh I wish was kid again beneath the painted sky
```
