Bury Me Deep-Hank Snow
Author:Ted Daffan

```
C                            F
Tired of life all alone and blue
     G7           C
Happiness I never knew
                                        F
In this cold world there's nothing for me
              G7           C
Now won't you hear my only plea

                                      F
Bury me deep where the sun doesn't shine
           G7                C
Because sunshine I've never known
                                     F
Dig down deep where the ground is cold
          G7           C
Dark and cold and all alone

                   F
Happiness I never knew
         G7                  C
And now I find I can't have you
                                    F
Trouble and tears are all that I see
           G7                    C
Now you are gone please hear my plea
```
