Dixie On My Mind-Hank Williams Jr.
Author:Hank Williams

```
C                                                F
All the stations up here they don't sign off with Dixie
    C                              G7
The way they did in sweet home Alabam
    C                                    F
And the people here don't sip Jack Daniels whiskey
    C                   G7                   C
The way they do in the Tennessee mountain land

                                        F
I've always heard a lot about the Big Apple
   C                               G7
So I thought I'd come up here and see
    C                                 F
But all I've seen so far is one big hassle
     C                 G7             C
Wish I was camped out on the Okeechobee

   F                                C
If this is the promise land I've had all I can stand
                                        G7
And I'm heading back below that Dixie line
     F                             C
No I just don't fit in and I'll never come back again
                        F                    C
But I'm busted here and I got Dixie on my mind
                         F                   C
Oh I'm stuck up here and I got Dixie on my mind

                                    F
These people never smile or say a word
       C                                      G7
They're all to busy trying to make an extra dime
      C                                        F
Oh I'd love to haul them all down around Spartanburg
    C                       G7          C
And show 'em how to raise hell in Caroline

                                           F
Oh the things you know that I miss most of all
      C                                G7
Is the freedom of the rivers and the pines
     C                                              F
They don't do much hunting and fishing up here you know
      C                            G7          C
But I have met a few squirrels and one porcupine

     F                                    C
Well if this is the promise land I've had all I can stand
                                         G7
Wish I was down in Houston town tonight
      F                                  C
Now I just don't fit in and I'll never be back again
                        F                    C
But I'm busted here and I got Dixie on my mind
                           F                      C
Lord I'm stuck up here and I got Dixie on my mind
```
