Don't Do The Things He'd Do-Wanda Jackson

```
C                                  G7
Don't say goodnight   like he would do
                                  C
Don't whisper low  I love you true
C7            F                    C
Like he would do  as he held me tight
              G7                   C
Just kiss me soft  then say goodnight

C7           F                          C
Don't do the things that remind me of him
                                   G7
Though time has made the memory dim
C         F                        C
I still recall  through bitter tears
               G7                 C
His love just left  me lonely years

                           G7
It isn't fair  to you are me
                           C
Our love would be  just misery
C7             F                      C
My heart can't stand  the things you do
          G7                C
For I see him  instead of you

C7       F                        C
If don't change we'll have to part
                                   G7
Though it will cause two broken hearts
C              F                  C
Love must be strong  enough to last
         G7                  C
So I'll forget  about the past
```
