Don't Get Married-Merle Haggard
Author:Tommy Collins

```
C                          G7
Julie they've taken me to prison
                                        C
I pulled the gun and robbed the jewelry store
                                    G7
The only thing I took was that big diamond
                                       C
You know the one you said you wish was yours

                                     G7
The diamond in the window called for money
                                      C
The price was just too much for me to pay
                                        G7
But the price I'm paying now is so much bigger
                                    C
Oh Julie don't I have the right to say

C7        F                       C
Don't get married Julie wait for me
          G7             F               C
Don't get married cause someday I'll be free

                                      G7
Julie when I serve the time they gave me
                                              C
I'll walk out through the gates and I'll be free
                                   G7
I hope you didn't only want the diamond
                                    C
Cause I pray that you also wanted me

C7        F                       C
Don't get married Julie wait for me
          G7             F               C
Don't get married cause someday I'll be free
```
