Don't Monkey With Another Monkey's Monkey-Johnny Paycheck
Author:Dale Morris

```
C                          F                   C
I was up in Virginia at a place called Pappa Joe's
                                D7                   G7
I looked across the dance floor saw a girl I didn't know
C                               F                C
I was really showing off when I took her by the hand
                                     G7                    C
I said come on and dance with me I'm gonna be your loving man

Well don't monkey with another monkey's monkey
       F                          C
If you don't want a gorilla on your hands
                                          D7                    G7
I monkeyed with another monkey's monkey and I met a gorilla man
C                                  F                     C
We were really turning it on and boy I was having some fun
                                                    G7            C
And that's when I discovered I was a holding that gorilla man's hon

                                       F                 C
We were out on the dance floor when I happened to look around

I saw this gorilla coming towards us
   D7                             G7
He must of weighed three hundred pounds
C                                  F                      C
I had a lot of time to think it over lying in this hospital bed

I monkeyed with another monkey's monkey
                 G7              C
And her gorilla whupped upon my head

Repeat #2
