Don't Stay Away Too Long-Ernest Tubb
Author:Don Whitney and Ernest Tubb

```
C                                  F
Don't stay too long cause I'm too lonesome
               G7                  C
Don't stay too long cause I'm too blue
                                   F
When you're away I'm so downhearted
               G7                  C
Don't stay too long cause I love you

                                   F
When you are here I'm so contented
           G7              C
Each minute is a joy for me
                                      F
But when you go my heart starts crying
           G7                  C
My darling want you heed my plea

                                      F
Your letters come but still I'm lonely
             G7                 C
Cause letters can't erase my tears
                                      F
In dreams I have my arms around you
             G7                    C
The days and nights now seem like years

                                    F
I'll walk the floor and think about you
             G7                 C
I just can't find a thing to do
                                         F
But when you're near my life's a pleasure
           G7                     C
I can't get by if I can't have you
```
