**Don't Take It Out On Me-Hank Thompson**

```
G                              E7
Just because you were hurt by someone
D7                   G
Don't take it out on me
                               E7
Although I know you love that someone
A7                          D7
More than you ever loved me

C                G
You always will remember
    C            G
The day he went away
                     A7
For love has left an ember
                      D7
That burns your heart away

    G                            E7
The love you thought would last forever
D7                 G
Is now just a memory
                               E7
Just because you were hurt by someone
D7                   G
Don't take it out on me
```
