Easy Come On-Kris Kristofferson

```
C
Everybody called the lady Easy
                          G7
From the way the lady was to please

Everybody told her she was crazy
                           C
Givin' all that love away for free

People wait to see you make it easy
                 F
They'll never understand
                                      C
Some take life for granted 'cause it seems to take so long
G7                        C
Easy takes it any way she can

                                   D7
Easy come on take it easy come on here we go again
G7                       C
Let it go as easy as you can
                                             D7
It's the sweetest and the saddest place nobody's ever been
G7                       C
Feelin' easy come and go again

So let's take our time and make it easy
                          F
Bring that bottle from the shelf
                                   C
Everybody's laughin' when there's money love and friends
G7                                    C
When they're gone the jokes are on yourself

                           D7
Easy come on take it easy come on here we go again
G7                         C
Let her down as easy as you can
                                             D7
It's the sweetest and the saddest place nobody's ever been
G7                       C
Feelin' easy come and go again

                                   D7
Easy come on take it easy come on here we go again
G7                                C
Bring us down a bottle from the shelf
                                      D7
Cause it's easy come to anyone with money love and friends
G7                                    C
When they're gone the jokes are on yourself
```
