Easy Touch-Don Williams
Author:Rory Bourke, Tommy Rocco, Charlie Black

```
G                                          D7
I'm an easy touch she knows it everybody does
  Am             D7               G
I just can't say no she calls  I go
            C                              G
And I would bring her the world on a silver platter
                           C
Oh but things like that don't matter
D7                                                  G
All she wants is all my love and for that I'm an easy touch

                                                  D7
I'm an easy touch I love her she don't know how much
  Am          D7                    G
I just can't resist she wants she gets
            C                              G
And I would gladly pay any price to be with her
                           C
Oh there's nothing I wouldn't give her
D7                                                  G
All she wants is all my love and for that I'm an easy touch

       D7
I just love to hear her say honey there's something I need today
       C                               D7
It's a sure sign that love is on the way
G           C                              G
And I would gladly pay any price to be with her
                           C
Oh there's nothing I wouldn't give her
D7                                                  G
All she wants is all my love and for that I'm an easy touch
