First Train Heading South-Johnny Horton

```
C
I didn't know my baby loved me so
F                                C
Until that letter come to let me know
    F                            C
Now I pack my bags and then I'll go
    G7                                C
And catch the first train I see heading south

If I got this letter in Idaho
F                                      C
Where snow's so deep it wouldn't let me go
    F                                 C
I'd went hog wild and melted all that snow
    G7                                  C
And caught the first train I saw heading south

If I got this letter in Iowa
F                                   C
Nothing in this world could make me stay
    F                               C
I'd grab my hat and then been on my way
    G7                                   C
And caught the first train I saw heading south

repeat #1

If I  d got this letter in Ohio
F                                     C
With a busted back two arms and broken toe
        F                           C
There'd be no hesitation I would go
    G7                                C
And catch the first train I saw heading south

But I got this letter up in Maine
F                                       C
You can bet your bottom dollar I feel the same
    F                                  C
Every clickety clack of drivers call her name
     G7                                   C
As I ride this first train I caught heading south
