Foolish Pride-Ricky Van Shelton

```
C                          F
You always try to stop me from telling her I'm sorry
C                                      G7
You act as though you like to see her cry
    C                             F
And you tell me she's the reason we can't get along
C             G7                  C
Even though I know the fault is mine

                               F
Foolish pri-de don't stop me now
              C                        G7
Just leave us a-lone we'll work it out
           C             C7            F
I could be holding h-er if you step aside
                  C    G7      C
So don't stop me now  foolish pride

                           F
I know I'm gonna lose her if I don't treat her better
C                                      G7
I'll wake up and she'll be gone one day
   C                   F
So even if I have to I'll get down on my knees
C                      G7              C
And I don't need you standing in my way
```

Repeat #2
