For The First Time -Gene Watson
Author:Ray Griff

```
C                  C7   F
For the first time in a long time
           G7                   C
I want the sunshine to shine on me
                      C7         F
I want those hillsides to feel me walking
      G7                       C
And I want your love all over me

Ten years ago I guess you know
  F
I gave my heart and my hand
    G7                                    C
But she left me here to grieve but never know

All my days have been like nights
   F
My nights have been long days
    G7                            C
But when I saw you I knew I'd love again

                      C7   F
For the first time in a long time
           G7                   C
I want the sunshine to shine on me
                      C7         F
I want those hillsides to feel me walking
      G7                       C
And I want your love all over me
```
