Forbidden Lovers-Hank Snow

```
G
In the darkness of the night
          D7
While the world around us sleeps

We keep a secret rendezvous
                      G
Where people like us meet

Nobody knows it's there
         D7
It's the lonely part of town

The only place we know to go
                      G
To hide this love we found

          C
Forbidden lovers you and I
        G
Gone to far to say goodbye
             D7
Though we're tied by vows
                     G
That hold us honor bound

          C
Forbidden lovers I'll admit
             G
But it's too late to call it quits
        D7
How can we give up
                    G
The happiness we've found

So we'll keep our rendezvous
          D7
Where the music's soft and sweet

And take the chance we might be caught
              G
Every time we meet

Repeat # 2, 3, 4

Tag:    D7
How can we give up
                    G
The happiness we've found
```
