Forever Again-Gene Watson
Author:Dave Kirby and Warren Robb

```
C
I wish I could step out of my mind
     F                                C      G7
Then I could be someone that's never k-nown you
    C                                  F
But I can't change the way I am much less the way you feel
   C                G7          C
Or you'd be loving me forever still

F                 G7          C
I can't stop the winter from turning into spring
   F                              G7
Or summer giving way to autumn winds
       C                  F                 G7             C
But if I could take the world and make it face the other way
F                   G7      C
Then you'd love me forever again

If I had a way of changing time
    F                             C    G7
I'd stay busy turning back the p-ag-es
   C                             F
If I could make a miracle I'd make one just for you
    C                G7          C
And you'd be loving me forever too

repeat #2
