From Here To The Door-Johnny Paycheck
Author:Don Chapel
[3/4 time]

```
G                 C            G
Well it's only my love you are taking
                C              G
And it's only my heart you are breaking
                          C                G
To you it will be only footstep you're taking
                             D7           G
But it's my lifetime from here to the door

     C                           G
From here to the door is your freedom
                                 D7
To you a short walk across the floor
   G                C                 G
If you go now this house will be a prison
                               D7           G
Cause it's my lifetime from here to the door

                            C                     G
There you stand now but I guess that you're going
                          C           G
Where I found you I've no way of knowing
                            C
To you it's a cold wind blowing
             G               D7           G
But it's my lifetime from here to the door

repeat #2

                             D7           G
Yes it's my lifetime from here to the door
```
