Georgia Keeps Pulling On My Ring-Conway Twitty
Author:David Wilkins and Tim Marshall

```
G                          D7            G
Sweet sweet Georgia keeps pulling on my ring

                           G7           C              G
Most men would give their right arm or anything they own
                                     A7                        D7
To have a woman just like you to be waiting when they come home
        G             G7               C         G
But the devil made me cheat on you one too many times
                                   D7           G
And honey I'm sorry but she left heaven on my mind

               G7            C              G
Georgia sweet Georgia keeps pulling on my ring
                                          A7                   D7
I need her and I love her Lord she's a sweet and precious thing
    G                      G7          C             G
Her sweet and easy loving Lord beats all I've ever seen
                                    D7             G
Georgia sweet sweet Georgia keeps pulling on my ring

                         G7        C       G
I didn't wanna fall in love with anybody else
                                 A7                   D7
But when I tasted heaven Lord I just couldn't help myself
  G                 G7                 C                          G
I pray someday that you'll forget and forgive me for all these things
                                              D7              G
I just can't seem to love you with Georgia pulling on my ring
```
