Getting Over You Again -Ray Price
Author:Warren Robb and Dave Kirby

```
G                                   C
Here you are again just when your memory
    D7                              G
Was only sleeping with me now and then
                                     C
Please don't look at me or say you love me
 D7                                          G
I don't think I can go through getting over you again

                                C
Here you are again when I was ready
   D7                            G
To make it without leaning on a friend
                                           C
Don't play games with me 'cause I can't take it
  D7                                        G
I don't think I can go through getting over you again

C
'Cause I already know you'll just come and go
A7                                  D7
You're just passing through like the wind
G                                C
Here you are again and I still love you
  D7                                    G
I hope I don't go through getting over you again

C
'Cause I already know you'll just come and go
A7                                  D7
You're just passing through like the wind
G                                C
Here you are again and I still love you
  D7                                    G
I hope I don't go through getting over you again
