Give Her My Best-Tom T. Hall

```
C                            F
I don't wanna fight about it we've been friends too long
G7                        F     G7          C
Someone ought to tell you buddy you've been wrong
                                F
You know that I stepped aside so you and she could wed
D7                                G7
You've spent half your married life in someone else's bed
C                                    F
Just tell her that you met someone you used to know before
                  G7                 C
Give her my best you never gave her yours

                                  F
There's nothing I can tell you that you don't already know
G7                                 F      G7        C
You two people made your choice a long long time ago
                                   F
I'm not bitter it just hurts when someone lets you down
D7                               G7
I just feel she ought to know that I am still around
C                                  F
She might need to talk to me and that's what friends are for
                  G7                 C
Give her my best you never gave her yours

                                  F
I wonder if you know the way I feel about her now
G7                                          F        G7       C
You're like the dog that sleeps on hay and keeps it from the cow
                                  F
She's not mine but if she were she wouldn't be alone
D7                                         G7
For what it's worth she's worth more love than you have ever shown
C                                   F
You've got my word I wouldn't know what happens behind your door
                  G7                 C
Give her my best you never gave her yours
```
