Give Me One More Chance-Red Steagall

```
C                                    F                C
Darling think about the good times and the places we've been
                                     G7
Then think about the pain when love is gone
C                                F           C
If you'll try again love I'll do anything you say
F                    C          G7        C
Just give me one more chance to right the wrong

F                 G7                 C
Give me one more chance to say I'm sorry
F                    D7                 G7
And prove my power of love's not really gone
F                   G7                 C                      F
Let me put my arms around you hold you close and say you're mine
C                 G7                   F
Give me one more chance to right the wrong

C                                   F                 C
You know I don't mean for things to hurt the way they do
                                                     G7
Can't stand the thought of living when you're gone
C                                   F            C
Yes if you'll try again love I'll do anything you say
F                    C          G7        C
Just give me one more chance to right the wrong

F                 G7                 C
Give me one more chance to say I'm sorry
F                    D7                 G7
And prove my power of love's not really gone
F                   G7                 C                      F
Let me put my arms around you hold you close and say you're mine
C                 G7                   F     C
Give me one more chance to right the wrong

F                   G7                   C                      F
Let me put my arms around you hold you close and say you're mine
C                 G7                   C
Give me one more chance to right the wrong
```
