Go Away-Lorrie Morgan
Author:Stephony Smith, Cathy Majeski, Sunny Russ

```
C         F
Touche touche
                                    C
You're right there's nothing I can say
                   D7
I'm a swishy washy girl
                        G7
But it's a wishy washy world

                     C
Go away  no wait a minute
                    F
I want out but I want in it
                        G7
I'm all confused but I admit it
                     C
Go away no wait a minute

                F
Se ‘La Vie ‘La Vie
                                   C
That's what you get when you get me
                                  D7
I have the right to change my mind
                               G7
At least a couple hundred times
```

Repeat #2

```
F
I need some help I'm not quite myself
C                         C7
And lately I'm a nervous wreck
          F
My whole world has changed
                                D7
The reason I'm strange is I love you
                               G7
And baby that scares me to death
```

Repeat #2

```
F                         G7
I'm all confused but I admit it
                     C
Go way  no wait a minute
```
